-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claims 1-57 are pending in this application.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-18, 29-50, drawn to a method of providing remote access to a group of editors through a central provider, classified in class 707, subclass 1.
 - II. Claims 19-28, drawn to a user interface allowing a holder of a digital image to input instructions on how to modify said image, classified in class 715, subclass 500.
 - III. Claims 51-54, drawn to a method of facilitating modification to a work piece where the work piece is at a remote location without going through a central provider, classified in class 345, subclass 415.
 - IV. Claims 55-57, drawn to a method for allowing a holder of a digital image to utilize the service of a photo illustrator at a remote location without going through a central provider, classified in class 345, subclass 619.
3. The inventions are distinct, each from the other because of the following reasons:

The inventions are distinct, each from the other because of the following reasons:
4. Inventions 1, 2, 3, and 4 are related as combination and subcombination.

Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other

Art Unit: 3621

combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because inventions I, III and IV are directed to modifying a digital work remotely. Invention II is not directed to remote work. Additionally, invention I requires a central provider, whereas inventions III and IV specifically do not. Further, invention IV is directed the utilization of a photo editor, whereas invention III does not. Thus is separate utility conferred on all the inventions. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Applicant is further advised that invention I is further subject to election of species:

IA. Claims 2-4 directed at the use of typed or graphic instructions without regard to interface.

IB. Claims 4-10, 46-49 directed at editor selection based on various criteria.

IC. Claims 11-12, 34, 43 directed at having the fee determined by the provider.

ID. Claims 13-15, 30-31, 39-40 directed at a customer or user interface through which the user may input instructions.

IE. Claims 16-18, 32, 41 directed at the generation of a cost estimate by the provider.

IF. Claims 33, 42 directed at additional requests for clarification from the provider to the customer.

IG. Claims 35, 44 directed at the generation of a hardcopy of the modified image.

Art Unit: 3621

IH. Claims 36,45 directed at third party access of to the modified image.

IJ. Claims 37, 50 directed at various types of image modification.

6. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, 1, 29, and 38 are generic.

7. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

8. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

9. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Art Unit: 3621

10. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

11. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

12. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Cristina Owen Sherr whose telephone number is 571-272-6711. The examiner can normally be reached on 8:30-5:00 Monday through Friday.

13. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James Trammell can be reached on 571-272-6712. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

14. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
